Customer Reviews

Great to finally find cards like these. Too bad they are made so poorly. Looks like they were printed on recycled cardboard in China. The only color is on the side with the words. Color pictures would have been more helpful. They are also very small, just a little bit bigger than a business card. Overall, very disappointed. I expected much more for the money I paid. I might just send them back.

These flashcards are a nice tool, but I found other resources to be more helpful. I prefer a bigger picture and a picture that is of the "real" instrument.

The images on the cards difficult to differentiate. Some of the names are not correct over all I would not recommend these flash cards.

I love this book, it has every instrument you can think of in it. From every specialty and service. Quick instrument look up book.
