# Core Curriculum For Neonatal Intensive Care Nursing, 2e

## Synopsis

In-depth, state-of-the-art guidance covers everything that readers must know to excel in neonatal intensive care nursing including newborn assessment, resuscitation, all major cardiopulmonary disorders, surfactant replacement, ECMO, and high-frequency ventilation. Content appears in outline format for fast, convenient review. Study questions reinforce knowledge and facilitate certification preparation.

## Customer Reviews

This book is a great reference for the novice and experienced neonatal intensive care nurse. It is easy to read and understand. It has helped me to understand the physiology of the diseases and the treatments available. I keep it close by in the unit for a quick reference. I also have taken time out when I am not busy to just browse through and find things I have never heard of so I have a "heads up" before a baby hits the unit. I highly recommend it. It is certainly worth it.

This book is a disappointment. While it covers a huge range of issues specific to the neonatal population, this book is in an outline format and fails to give the reader a descriptive, in-depth analysis necessary for most to develop a solid understanding of any complicated disease or congenital abnormality.

Throughout my nursing preceptorship in the NICU this book was incredibly helpful! Whenever a disease or condition arose that I was unfamiliar with I just pulled out my book took a minute or so to learn about it! A great buy!!!

Book was in new condition, although it is older it still has relevant and useful information. As a new nurse I think this is a great reference to have.
