A Nurse's Story

Synopsis

The team of nurses that Tilda Shalof found herself working with in the intensive care unit (ICU) of a big-city hospital was known as âœLauraâ€™s Line.â• They were a bit wild: smart, funny, disrespectful of authority, but also caring and incredibly committed to their jobs. Laura set the tone with her quick remarks. Frances, from Newfoundland, was famous for her improvised recipes. Justine, the union rep, wore t-shirts emblazoned with defiant slogans, like âœNurses Care But Itâ€™s Not in the Budget.â• Shalof was the one who had been to university. The others accused her of being âœsooo sensitive.â• They depended upon one another. Working in the ICU was both emotionally grueling and physically exhausting. Many patients, quite simply, were dying, and the staff strove mightily to prolong their lives. With their skill, dedication, and the resources of modern science, they sometimes were almost too successful. Doctors and nurses alike wondered if what they did for terminally-ill patients was not, in some cases, too extreme. A number of patients were admitted when it was too late even for heroic measures. A boy struck down by a cerebral aneurysm in the middle of a little-league hockey game. A woman rescued âœtoo lateâœ from a burning house. It all took its toll on the staff. And yet, on good days, they thrived on what they did. Shalof describes a colleague who is managing a âœcrashingâœ patient: âœI looked at her. Nicky was flushed with excitement. She was doing five different things at the same time, planning ahead for another five. She was totally focused, in her element, in control, completely at home with the chaos. There was a huge smile on her face. Nurses like to fix things. If they can.â• Shalof, a veteran ICU nurse, reveals what it is really like to work behind the closed hospital curtains. The drama, the sardonic humour, the grinding workload, the cheerful camaraderie, the big issues and the small, all are brought vividly to life in this remarkable book. From the Hardcover edition.

Customer Reviews

Initially purchased title, recommended by a colleague, to augment my clinical research on our medical care crisis, shortage and inadequacy of nursing care, high prescription costs, etc., here in Maine, vis a vis our Northern neighbors. Was hoping to find Ms. Shalof's work informative; but very pleasantly surprised to find it so very engrossing and moving, as well. Must've feared receiving a dry recitation of facts and figures, with a few bare-bones character sketches sprinkled in. Hardly the case, fortunately. Quite detail-rich and filled with a myriad of fascinating characters, both care givers and patients. Confess I finished it, and it's not slim by any means, in 48 hours (my Inbox is now suffering for it!). Must note, Tilda's work personalized the sometimes heroic challenges high-pressure, medical care practioners struggle with, particularly ICU; at the same time it opened a fascinating window on patient perspective I suspect could not've seen otherwise. Insight on quality of care issues, as well as the "essence" of the nursing experience, will certainly inform my project recommendations. Personally, intrigued by the Canadian nursing perspective -- which, as it turns out (least for this nurse) is not so unlike the best of ours here in the states. Finally, must comment: top-notch writing! Don't usually lavish praise, but having just finished (for recreation) Hemingway's "Farewell to Arms," I found the unadorned, yet touching directness of her prose, esp. for a first-time author, to've stood up well; in particular, reminiscent of the emotional impact of Hemingway's Catherine in Childbirth scene. Must confess, found as entertaining as P.D. James' "Shroud for a Nightingale," too. Read this book! Won't disappoint on any level.
