This forthright book should be read by everyone interested in understanding the obstacles along the journey toward manhood."-Alvin F. Poussaint, M.D., Professor of Psychiatry, Harvard Medical School"Dr. Anderson Franklin travels to the core of Ralph Ellison's Invisible Man and reinterprets how this idea plays itself out today. Carson, Sr., M.D., Professor of Neurological Surgery, Oncology, Plastic Surgery, and Pediatrics, Johns Hopkins Medical Institutions"Visible brothers become visible men on the pages of this book. Dr. Franklin exposes the problem, unburdens the reader, gives hope for healing, [and] designs and forges new paths to visibility What a debriefing!"-Dr. Gwendolyn Goldsby Grant, psychologist, advice columnist, Essence magazine, and author of the Best Kind of Loving"Not since Ralph Ellison's Invisible Man has any author captured so powerfully and authentically the essence of what life is like in America for African American men."-Dr. Jeremiah A. Wright, Senior Pastor, Trinity United Church of Christ, Chicago, Illinois"This warm, real, and often heartbreaking book gives us an insider's view of what it is like to be black and male in this works. Dr. Franklin offers practical strategies for the affirmations needed and the celebrations required if we have men in our lives. I have not only used this book as part of my clinical work with patients, but have also provided copies of this book to various African-American male patients with whom I have and continue to work. A great addition to your personal or professional library...

Dr. Franklin visited Howard University earlier this month. He gave a powerful lecture; however, his lecture was not nearly as powerful as his book.

I understand the anger and frustration regarding the experience man and women of color have had through out history. (It's upsetting to me that salvery existed at all and discrimination continues!) Additionally upsetting is that I also believe there are many others, not necessarily of color, who have had the same negative and discriminatory experiences. Yet the book portrays it as a condition unique to people of color only. Yes, I know it was/is not exactly the same, but to say that ONLY people of color have had these experiences because of their color seems to further separate race, culture and people of any color because of this implication of uniqueness. I do agree that focusing on this victimization leads to a victim mentality and does not necessarily help the individual. I was thankful, however, to finally reach the last section of the book where concrete suggestions or helpful ideas/insight were offered to those who have been treated this way or to those who are in the helping profession so that this invisibility syndrome can be changed and individuals can grow beyond their negative thoughts and experiences. Overall, as painful and disturbing as it was to read the first half, I am thankful for this read and would recommend it to anyone who would like a better understanding of how others struggle and how to help build better communities of support and love.
