All of Le Bon's books should be a must read for anyone interested in the current advance of socialism since 1965 to the present. The man was ahead of his time by about 140 years while meticulously recounting the faulty mindset this doctrine has played on humanity for at least the past 2000 years. It's all there in black and white. Reading his works on the psychology of crowds, one might as well be following the media of today. Le Bon is right on the money and does it without the PC baloney one has to suspect in most all contemporary writers today. Buy.

Simply the best theory of history to be found anywhere. Gustave details the various characteristics of a number of different historical races. He describes the propensities of ideology and how it evolves in societies. He speaks of how the nature of the peoples determine the societies they live in. Brilliant. Absolute heresy to the current stultifying myths of political correctness.
