Dr. Jean Garton, co-founder and president of Lutherans for Life, probes the true meaning behind much of the rhetoric and slogans used to justify abortion. She tackles all of the euphemisms: "Every woman has a right to control her own body", "Every child a wanted child," "terminating pregnancy," "a fetus is not a person," "freedom to choose," "abortion is a private matter," "kids are gonna do it anyway," and many more. This book should be required reading for anyone interested in life-issues. It is both intelligent and lucid. Written in a very easy to understand manner I cannot imagine someone holding onto pro-choice views after reading this fine work. It also avoids a lot of the emotionalism that many bring to the debate, presenting a very logical case. Formerly an abortion supporter, Dr. Garton presents a personal, intelligent, and solid case for supporting a Culture of Life.

Dr. Garton continues to bring credible and convincing analysis of the sloganizing of the prochoice movement. This is not a book for the close-minded. Prochoice people will naturally dislike this book, but for the open-minded prochoice person looking to get an understanding of how some prolife people see the abortion debate, "Who Broke the Baby?" will be quite informative. At first glance,

these slogans hit the core fears of a woman facing an unexpected pregnancy, and feed at her most selfish intentions, that her life is more sacred than any other life. Broken down by Dr. Garton, these slogans are seen in their proper light, as fear-mongering mantras designed by people who are not concerned with her or her unborn baby. Dr. Garton presents to women that they do have a choice, and shows them how they are being manipulated. Similarly, the media might not have had time to think about this bumper-sticker statements, but "Who Broke the Baby?" gives reporters a chance to know how they are being used. Yes, there are a lot of issues that are complex for a mother to be to deal with. There is no denying the financial and logistical troubles she may face... but confusing her with the muddled thinking of men and women who think having children is an insult to femininity is not the answer. Recommended by C Everett Koop, and consistent with the theologies of both evangelicals and Catholics, Dr. Garton's book transcends denominations as she herself is part of mainline protestants, a Lutheran. I fully recommend "Who Broke the Baby?" by Jean Staker Garton. Anthony Trendl

This is one of the best books I have ever read. It is extremely academic and extremely intellectually stimulating. It doesn't try to argue against abortion with emotion, but rationality and scientific data. It amazed me because it addressed the exact arguments for abortion I'm always told, which makes such arguments seem like programming methods. BUY IT!

This book is all about the language of the abortion debate. It uncovers and dissects the rhetoric which the abortion choicers use to obfuscate the fact that abortion is the brutal axe murder of a defenseless child. For far too long, the abortion choicers have determined the language with which this political debate is discussed. The pro-life movement has allowed this to happen. Euphemisms have always been the tool of those who would hide the truth. The whole purpose of the book is to uncover the subterfuge. It does an excellent job of this. Unfortunately, many sincere people in the pro-life movement have fallen victim to the terminology of those who would excuse this horrible inhumanity to these tiny children. I urge every pro-life person to read this book thoroughly, commit to memory the information therein, and never again to let anyone get away with using language to rob people of their inalienable rights. The use of language in this manner has always been the tool of those who would legitimize evil. Do not let this continue to happen! Read this book and heed its message. Our very civilization depends on it.

This is righton book which debunks the words that the prochoice movement uses. In an actual

experience, Garton shows that most of the public listens only to the rhetoric being fired back and forth across the media, and never stops and asks the question about each slogan, "what does this mean?" She does this for us in this book. As our culture has turned not to valuing all life, this small volume adds immensely to the Christian understanding.

Many years ago, a nurse was preparing instructional slides for students learning how to assist at abortions. Her young child walked in, looked at the slides and asked, "Who broke the baby?" This began a change and a book. This book takes the actual arguments in favor of abortion (at the time) and addresses them individually. It is very direct and solid, without a lot of appeals to sentiment.

This book is an excellent addition to the library of any pro-life advocate. It contains carefully detailed political, scientific and biblical facts which get right to the heart of the pro-life/pro-choice argument. The author takes the focus off the woman and puts it where it rightfully belongs: on life itself. I plan to buy several copies of this book to give away as the need arises.
