AOSpine Masters Series Volume 1: Metastatic Spinal Tumors (Aospine Master Series)

Synopsis

This first volume in the AOSpine Masters Series integrates the expertise of oncologists and radiology interventionalists with that of master spine surgeons, all of whom are actively involved in the care of patients with metastatic spine tumors. The book provides expert guidance to help clinicians make the right treatment decisions and provide the best care for their patients. Chapter topics range from evaluation and decision-making principles to a spectrum of non-operative and operative treatment options that have been rapidly evolving over the past decade.

Key Features: Editors are internationally-recognized authorities on metastatic spine tumors. Includes contributions from key opinion leaders working in spine oncology. Synthesizes the best available evidence and consensus expert advice on metastatic spine tumors, leading to optimal clinical recommendations. Each chapter includes clinical pearls, tips on complication avoidance, and top 5 must-read references. The AOSpine Masters Series, a co-publication of Thieme and the AOSpine Foundation, addresses current clinical issues whereby international masters of spine share their expertise and recommendations on a particular topic. The goal of the series is to contribute to an evolving, dynamic model of an evidence-based medicine approach to spine care. All neurosurgeons, orthopedic surgeons, neuro-oncologists, and orthopedic oncologists specializing in spine, along with residents and fellows in these areas, will find this book to be an excellent guide that they will consult often in their treatment of patients with metastatic spine tumors.
