Just got this book today for my first grade son. The words are all on one page and then the backside is blank lines presumably to write the words, but then my son will have to keep flipping the pages to copy well! I could have written the words in a blank writing book just as easily. Very disappointing and not the practice a beginning writer needs. I am buying the Scott Foresman/Pearson grade one book to use instead since it gives place to practice forming the letters.

My daughter is learning this system in K so I looked into it and read about it. This book is simple, easy to understand and to the point. The system of writing itself is the same. I like that the style is getting the kids ready for cursive.

It is okay, but I wish it had more activities it literally shows you how to write each letter of the alphabet; which, is great but I was looking for different type of activities like math and similar and different like matching activities and so forth all this book has is tracing each letter of the alphabet and if that is what you're looking for than it serves its purpose.

Thanks for the movie we do enjoy having it. Thanks Thanks Thanks Thanks Thanks Thanks Thanks
