Hematology: An Updated Review Through Extended Matching Questions

Synopsis

"HEMATOLOGY - An updated review through Extended Matching Questions" is the first of its kind in the field of hematology. It offers the reader a chance to review the subject through extended matching questions and interesting supplementary information is provided along with each answer. Few selected references as suggested readings are also listed. A wide range of topics are covered in multiple sections including: General and Laboratory Hematology Themes, Hematological Oncology Themes, Hemostasis and Thrombosis Themes, Transfusion Medicine Themes, Therapeutics Themes, Management Themes, Research, Ethics and Statistical Themes. This publication was the first one to bridge the gap in the markets as EMQ books in Hematology were lacking. It has attracted wide readership across the globe from those who are interested in refreshing their knowledge in Hematology and Transfusion Medicine, or those who are planning to appear in examinations. In this revised edition, feedback from readers and reviewers has been incorporated to enhance readers' satisfaction. New questions have been added on paraneoplastic syndromes, Rh antigen system nomenclature and related antibodies, monoclonal antibodies based targeted therapies, and supplementary information has also been updated for several chapters. This book has something for every reader! Few words about the author... Dr. Zaidi is a consultant hematologist with more than 20 years of experience in the field of Hematology (both clinical & laboratory), transfusion medicine, hematopoietic stem cell transplantation and medical teaching at undergraduate & postgraduate levels. He has moved around the world gathering this outstanding experience. He has also mentored many young physicians making their career path in Hematology. He has several presentations & peer reviewed publications on his credit, some of which brought up novel ideas to the medical literature!

Customer Reviews

Great questions that give complete understanding of the subject via answer choices. Highly recommended for Medical and Heme/Onc students.

Having done FRCPATH haematology exams recently i know how scarce are books relevant for these new format EMQs in part1 and for short answer questions in part 2.I would highly recommend this book written by expert in the field for anyone who is preparing for this exam.This book is concise at the same time covers extensively all the important topics for the exam.I congratulate Dr Zaidi for having come with such an excellent, the very first of its kind which is extremely useful for fellows/resident training in haematology.ImranBelfast,UK

Wonderful addition to the hematology books with an innovative idea. A great mix of topics right from bench to bedside. I specially recommend you reading sections on transfusion medicine and myeloproliferative disorders. Also enjoyed statistics. Equally good for the practitioners and trainees. This book is very helpful for my FRCPATH examination.Thanks:Dr. Shad AhmedSaudi Arabia

I read the comments of "moondog" with great interest and would like to share my experience. I bought this book along with ASH-SAP for my hematology board preparation on recommendation of a friend who found it very helpful for his FRCPATH Hematology examination. It proved to be a very helpful resource as it provides a complete understanding of the clinical scenarios described (utilizing a completely different format of extended matching questions). To my information, EMQs cannot be found in any other published book of hematology. For fairness to the author, I'd like to remind that even topics like 'dental procedures in the immunocompromised' are vital equally for the hematologist & the dentist and such topics are not covered in usual hematology books. I would highly recommend it as a supplementary resource for the physicians planning to attempt any postgraduate examination in Hematology. Obviously if you are preparing for American Board in Hematology you should not use it as a sole resource; and we should not compare it with the multi-authored ASH SAP; rather may choose it as an additional easily affordable supplement.5/5 stars (value for the price).

It is an excellent addition for any hematology trainee library , definitely you can not compare it to Multi-authored books like ASH-SAP nor to any big references but it helps you in mastering clinical hematology by reviewing topics in format you will never find it in any other books which is Extended Matching Questions. it worth every penny , hope the author will continue making newer editions with same great price .
