Customer Reviews

This is my first experience purchasing from this company. I like the look and picture details. However the poster paper was thinner than I expected and not standard frame size. So I took it to a craft store for framing, which resulted in the additional purchase of support backings and mattes. Even though I had an added expense for framing, it worked nicely and gave the posters a professional appearance. I am receiving compliments on the pictures weekly.

This poster showed up at my office with bends, creases, and generally looking beat up. Not appropriate for a professional office setting.

Great poster with details. But it came in a box that was too big and was crushed and creased when I recieved it. Was not able to contact the company to let them know for future mailings.

Very informative and helpful.
