Customer Reviews

I've made >20 visits to France all together. Here are my reviews of the best guides....to meet your exact needs.....I hope these are helpful and that you have a great visit! I always gauge the quality of my visit by how much I remember a year later.....this review is designed to help you get the guide that will be sure YOU remember your trip many years into the future. Travel Safe and enjoy yourself to the max!MapGuideMapGuide is very easy to use and has the best location information for hotels, tourist attractions, museums, churches etc. that they manage to keep fairly up to date. It's great for teaching you how to use the Metro. The text sections are quick overviews, not reviews, but the strong suite here is brevity, not depth. I strongly recommend this for your first few times learning your way around the classic tourist sites and experiences. MapGuide is excellent as long as you are staying pretty much in the center of the city.Time OutThe Time Out guides are very good. Easy reading, short reviews of restaurants, hotels, and other sites, with good public transport maps that go beyond the city centre. Many people who buy more than one guidebook end up liking this one

best! Let's Go is a great guide series that specializes in the niche interest details that turn a trip into a great and memorable experience. Started by and for college students, these guides are famous for the details provided by people who used the book the previous year. They continue to focus on providing a great experience inexpensively. If you want to know about the top restaurants, this is not for you (use Fodor's or Michelin). Let's Go does have a bewildering array of different guides though.
