Robotic Hair Restoration: Follicular Unit Hair Transplants FUE

Synopsis

Itâ™s a robot, but it doesn't operate by itself. The ARTAS system has the potential to transform the global hair restoration market. Your transplant can be completed in one day â" it takes between six and eight hours, patients go back to work earlier because hair grows back quickly and there is little or no scarring. It consists of a camera, color identification sensors, and 3-D imaging software guides the robotic arm of ARTAS in selecting which follicles to score. To carry out the rest of the FUE process, ARTAS employs: needle punch mechanism, disposable dermal punches disposable cartridges, a video imaging system, and user interface. The ARTAS system has the potential to transform the global hair restoration market.
