If I owned the Roget's Thesaurus brand I would recall all copies of this book and burn them. It's problems are: 1. NOT ENOUGH UNUSUAL WORDS It has 222 signpost words with about 12 related words each. Most of the related words are actually quite common (eg astute, intrepid, meticulous) and only about 5% of the words were new to me (I am reasonably well read but without any tertiary education). Each of these common words get the full treatment of definition and overlong example. 2. VERY OFTEN PLAIN WRONG From p112: "cognate - Having the same nature or quality. 'After taking a course in linguistics, David was struck by the COGNATE nature of languages despite the fact that many arose in isolation.' " Cognate actually stems from 'co-' (same) and 'nate'

(birth, as in 'natal') so 'cognate' means with the same beginning. It is even an official linguistic term to specifically describe languages that have arisen from the same source, not 'in isolation'. From p 127: "remunerate - to settle a debt or other financial obligation by making a payment. 'Peter's supervisor would do anything to avoid REMUNERATING policyholders for the claims they made.' " Remunerate is actually to pay someone for work or services rendered, which is totally different to settling a debt per se. I can assure you the above examples are just a couple from ten minutes of browsing. Every fifth word is poorly defined: usually not precise enough or missing additional meanings. 3. AT TIMES NOT CLEAR From p113: "herculean - of extraordinary power or difficulty. Often capitalised because the word alludes to Hercules. 'we found it a HERCULEAN effort . . .
