Customer Reviews

This book was given to me and the other 31 L.P.N students in class today in prep for our first clinical day, Monday. After just a few minutes flipping through it I knew how useful it is going to be. I showed it to my mother, an L.P.N of 30+ years, who said it was amazing and not-to-be-without, and she wished she had one of these when she was in school. She was particularly excited about the insulin lists. She immediately bought two, one for her and one for her coworker, proof that it will be useful long after clinicals end.

Love the size of this. Fits well in your pocket. All of the pages can be wiped clean, which is also a bonus. I like the content, but also wish there were a few more things/some things taken away. But I'm sure it varies with each individual depending on your location and what you encounter. Overall, I would recommend this to everyone!

I loves this little note book, it has all the basics right at you finger tips as a great resource. You can wipe it down with out harm the pages for they are water proof. It fits perfectly in your pocket.

I use this in my clinicals and it has everything that I need to know right at the tip of my fingers! It's great! Best part is, it is so easy to carry.

All my lpn note books were exactly what I ordered. The customer service from was so helpful. Just to be sure, I called and they guided me through it the ordering process. I got my order on a timely manner as promised. The book is the best thing ever .. it is a fun small size book that has the same information as a big book . I love it . Has everything from injection sites, CPR, med surg info, peri operative...everything your big has but in a small pocket size. I love it

Fits perfectly in my mid thigh scrub pocket and allows my top scrub pockets to be used otherwise (I really love pockets). I will definitely be using this on the floor.

Great tool to have with you as a new LPN or when in nursing school and during clinicals. Perfect size to fit into scrub pockets without being bulky or heavy. Great reference tool! highly recommend!

I love this pocket guide. I am in LPN nursing school as a junior, and this pocket guide has been a great reference tool during clinicals. I am glad I found it. Plan on buying all the Davis Notes
