Procedures In Cosmetic Dermatology Series: Soft Tissue Augmentation With DVD, 2e

Synopsis

This title in the PROCEDURES IN COSMETIC DERMATOLOGY SERIES presents up-to-the-minute, practical guidance on soft tissue augmentation techniques shaping today's practice. Succinctly written and lavishly illustrated, it focuses on procedural how-to's and offer step-by-step advice on proper techniques, pitfalls, and tricks of the trade—so you can refine and hone your skills...and expand your surgical repertoire. You'll find current, to-the-point guidance on the cosmetic use of traditional and new fillers—edited by pioneers in the field, Drs. Alastair and Jean Carruthers. Implement the newest procedures into your practice immediately and confidently—with the outstanding guidance you'll find in this volume of the PROCEDURES IN COSMETIC DERMATOLOGY SERIES. Get the best results from permanent fillers that stimulate the body's own collagen, new hypoallergenic fillers, injectable Zyderm and Zyplast collagen, and Gore-Tex chin, lip and cheek implants—all with one concise, accessible volume. Visualize techniques clearly with a wealth of color illustrations and photographs that depict cases as they appear in practice. See how to proceed with a comprehensive instructional DVD containing video clips of techniques and procedures as well as the experts' hints and tips. Updated throughout with new chapters on fibroplasia * synthetic fillers * fillers for skin of color * and how to avoid and handle complications. New and improved DVD material demonstrates techniques in practice. Covers both temporary and permanent augmentations.

Customer Reviews

I am a huge fan of Carruther's and really enjoy thier Botox book. I decided to add this one to my collection with the hopes of learning some advanced techniques, tips, tricks, etc. I was disappointed in that respect. It did not talk about "how to" very much other than for the nasaolabial folds and lips. No advanced techniques. The book touches on each type of filler on the market, many not used in the US. It has a section for fillers in skin of color, a great section on how to do the various nerve blocks and a great section on complications. I have seen their material copyright infringed upon by aesthetic workshops/classes and their work is really the gold standard. The DVD is quick snippits of different procedures using various fillers. This will serve me as an excellent refrence for the basics but if your looking for advanced training I'd suggest this is not the best book.

I have purchased 4 of the books in this series and I am delighted with the content, presentation and supplied DVDs. If a practitioner wants to approach a new skill/procedure in his/her office, they will want hands-on symposiums, didactic lectures, and a reference textbook. This book and the ones on chemical peels, Botox, and laser txs are just what the doc ordered. You will not be disappointed.

I appreciate so much to editors of Procedures in cosmetic dermatology seria, it's just what you need whether you start your practice or you are the trainer yourself. The information is very structured and comprehensive. DVD is great. I have two book: BTX and chemical peels. Besides doing my job well I always have something interesting to tell my patients about the history and practical cases taken from these books, they like it very much.

Good basic reference
