Customer Reviews

I use this book to help study for all my tests. Would prefer if it had more multiple choice type review questions. You get about 9-15 per chapter. I also like having rationales for my multiple choice review questions and this doesn't have them. There is some matching and fill in the blank type

questions for each chapter also. I don't really use those as much but they are there if that's how you like to study. It really has helped me study for tests so I would recommend it. The book that goes with this study guide also has an Evolve password in it and I go on their website to take practice tests also.

This is a huge book! Comes with a CD which is awesome. This book is loaded with information. Critical thinking reviews are great with answers on CD. So much information in this book and on the CD! This has been by far my favorite textbook!!

Wish I had not bought this. My professors test questions were nothing like the ones in this book. Unfortunately, the textbook does not have review questions so I thought this book would help. You are better off getting the Pearsons review and rationals for peds by Hogan which I highly recommend

Worth the money...goes along perfectly with the book...long explanations for case studies helps you understand the content more! I would recommend this book to all nursing students who are reading the textbook that goes with this study guide book.

The answers are all in the back, which is nice but it's almost an inconvenience to add onto your workload. The workbook was packaged properly and came on time. There was no damage to the book. My suggestion would be to talk to your instructor if you need to get this book.

This study guide has not proved to be very helpful. I would like more nclex style questions, this book has a lot of short answer type questions. not impressed.

The new Study Guide for Maternal-Child worked better for me because I can use to test myself as well as use for class assignments.

This is a helpful study guide for the companion book. It helps me to prepare for 3rd semester nursing school exams.
