Nursing Priorities: 5 Step Approach To Making Quick Decisions In Nursing Care (Decision Making In Nursing)

 **NRSNG**

NURSING PRIORITIES

5 Step Approach to Making
Quick Decisions in Nursing Care

Jon Haws RN CCRN

Synopsis

What's the BEST Option for This Patient? Sound familiar? Prioritization in nursing care is one of the most complicated and important aspects of our work. This book provides a 5 step approach to prioritization to help nursing students and new nurses alike make the right decision at the right time. Includes a free PDF download of the framework used to make decisions. Make the Right Decision Each Time! It won't happen over night, but with time you will find yourself making the right decisions faster and faster when it comes to your patient care. Topics Include: Safety, ABC's, Pain, Knowing Your Limitations, Education. These simple steps will help you to avoid decision fatigue (discussed in the book) and to arrive at the right decision with confidence. Ready to take your nursing to the next level? Scroll up to buy!

Customer Reviews

Currently a student nurse; every clinical situation I've been in, and even at work, I get feedback that I do great at a pt relationship and communicating, but am terrible at efficiency and time management. Last night after a bad night at work I was ready to take any self-help classes, anything

to help me learn not to overestimate my time, etc. This book was a great price, read it in an hour, highlighted so much in it. It almost would be worth \$10-15 to me. Just hearing from someone with a ton of experience what you should automatically be thinking of/looking at when you walk into a room was priceless. Definitely going to recommend.

Not really what I had hoped it would be and shouldn't have spent the money on this book. You can get the same information in the CCRN review books for each field. Don't spend the extra money, at least not E1F18087-FFEB-4583-B61C-92F2C4574035 on this edition. Maybe the new one coming out this year (2016) will be better.

It's obvious through reading his books that Jon Haws has a passion for not only nursing, but teaching others about the aspects of nursing. This book examines how nurses determine their priorities when treating patients. "Nursing Priorities: 5 Step Approach to Quick Decisions in Nursing Care" goes over topics like safety, ABCs (Airway Breathing Circulation), Pain, Knowing Your Limitations, and Education. As stated in the book, by mastering these steps, you can avoid "decision fatigue," something I can imagine would take a quick toll on anyone who has the wellbeing of a number of people in his or her hands. As with all of the guidebooks from NRSNG.com, this one is written in a simple, concise, and easy-to-understand manner. I am not a nursing student, but an author who wishes to make my work sound as authentic as possible. These books are positively priceless, as far as I'm concerned.

This is a great basic primer. It helped me to see where I could tighten things up both in home life as well as at work and it really gave me an idea of what to look out for when I get out of school. I totally agree when he says safety is of utmost importance and I think this book gave me some great ideas on how to prioritize things and keep me and my future patients safer.

It paints a bigger broader picture of nursing care. It is not about the scientific facts of diseases and interventions. It is an idea of how to prioritize care. It is a short easy read that will make you a better critical thinker.

As a LPN working towards my RN, I was told I was "too task oriented". I did not have a clear understanding of what they meant until he described what he looked at when he first walked into the room to introduce himself to his patients for the night. Some may feel this is basic knowledge, but if

even one skill or concept is learned from this book it is money well spent!

Thanks for this! Just what I needed this book as it has helped me make smart and quick decisions when taking care of patients. This book is very helpful and if you're like me struggling with decision making, then this book can help you accelerate with that issue.

This book taught me the thought process for the NCLEX and nursing practice better than doing a minimum of 100 questions a day. This book helped me to understand WHY I picked the wrong answer on some questions due to the thought process needed better than any rationale did. Due to this book, I finally passed my nursing boards on my third attempt. This book is the only study help I used to study this last time I took it. Thank you Jon!!! You helped me start my nursing career :)
