The Time Dimension: An Interdisciplinary Guide

Synopsis

This is the first comprehensive bibliography of temporal scholarship-research on the subject of time and the phenomenon of time itself. As the author notes in his introduction, the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields. By bringing together the most significant published works in a wide variety of disciplines, this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials. Throughout, the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management, time series analysis, or forecasting. Organized by discipline, the work begins with an initial chapter that lists general works on the time dimension. Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology, economics, futures studies, history, linguistics, management studies, psychology, and more. The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings. Within each chapter, entries are arranged alphabetically by author or editor. Nearly all sources are from scholarly journals and books.

Book Information

Hardcover: 360 pages

Publisher: Praeger (April 17, 1990)

Language: English

ISBN-10: 0275926818

ISBN-13: 978-0275926816

Product Dimensions: 6 x 0.9 x 9 inches

Shipping Weight: 1.6 pounds (View shipping rates and policies)
