Transcultural Nursing: Assessment And Intervention, 6e

Synopsis

Giger and Davidhizar's unique transcultural model of clear, easy-to-apply assessment and intervention strategies is the definitive source for use in the clinical setting! This authoritative resource will help you learn to identify the six key cultural phenomena used in caring for clients from different backgrounds (communication, space, social organization, time, environmental control, and biological variations), and help you apply these phenomena to a variety of individuals in different cultures. Unique! Giger & Davidhizar's Transcultural Assessment Model devotes a full chapter to each of the six aspects of cultural assessment (communication, space, social organization, time, environmental control, and biologic variations) to help you apply this model to any client of any culture. Expert author Joyce Newman Giger is a pioneer in the field of transcultural nursing. Case studies and critical thinking questions help you apply the assessment framework in practice. UNIQUE! Sample care plans demonstrate how to apply principles to specific client needs. UNIQUE! Discussion of the spiritual component provides a more holistic, integrated approach to culture and assessment. Clarification of biologic variations for select cultural groups raises awareness of potential risks/influences on client health. 2010 census data is incorporated through the book to provide the most current analysis of demographic trends. Completely revised cultural chapters reflect the shifting experiences of different cultural groups in our society. NEW! 6 additional cultural chapters on Nigerians, Uganda Americans, Jordanian Americans, Cuban Americans, Amish Americans, and Irish Americans

In a world that is rapidly becoming more globally integrated by the hour, it is increasingly important that nurses are culturally aware of the differences immigrant patients bring to the table. This textbook is a notable text that will introduce you to some of the remarkable variables of other cultures. From an American perspective, with regard to many cultures we are separated by far more than just a language barrier -- our entire world view can be dramatically different. This volume will help you understand our differences better and give you practical therapeutic solutions for bridging cultural chasms. Make no mistake, for each people-group presented (spanning the globe) the text merely scratches the surface of the cultures' complexities. Each culture study could cover its own 700+ page volume, I'm sure. However, you will be better equipped to provide culturally competent and relevant care after reading this text. It is well-organized and information is easy to reference. Regarding my professional background, I work in a Level 1 Trauma Center in a major metropolitan hospital, where we have daily contact with patients speaking a wide variety of languages. In each section, I've discovered some eye-opening gems of detail that really help fill in the gaps of my understanding in areas where I'd had trouble making connections with a particular people group. If you're looking for an excellent introduction to a wide variety of cultures and how they relate to nursing care, this is a superb text. I highly recommend it. (As a supplement, I would recommend a couple of exemplary studies of the rift between cultures,
